

Body Parts

Created using the Crossword Maker on TheTeachersCorner.net

Across

5. The crease or hollow at the junction of the inner part of each thigh with the trunk, together with the adjacent region.
8. The part of the body that lies between the thorax and the pelvis and encloses the stomach, intestines, liver, spleen, and pancreas.
9. The fleshy, movable, muscular organ, attached in most vertebrates to the floor of the mouth.
11. The large four-part extensor muscle at the front of the thigh.
13. A large, highly vascular lymphoid organ, lying in the human body to the left of the stomach below the diaphragm, serving to store blood, disintegrate old blood cells, filter foreign substances from the blood, and produce lymphocytes.
14. The joint between the thigh and the lower leg.
15. The chambered muscular organ in vertebrates that pumps blood received from the veins into the arteries, thereby maintaining the flow of blood through the entire circulatory system.

Down

1. Either of two spongy, saclike respiratory organs in air-breathing vertebrates, occupying the chest cavity.
2. Any of the membranous tubes that form a branching system and carry blood to the heart from the cells, tissues, and organs of the body.
3. The part of the human body between the neck and the diaphragm, partially encased by the ribs and containing the heart and lungs; the chest.
4. The portion of the vertebrate central nervous system that is enclosed within the cranium, continuous with the spinal cord, and composed of gray matter and white matter. It is the primary center for the regulation and control of bodily activities, rec
6. A large organ in the body that stores and metabolizes nutrients, destroys toxins and produces bile. It is responsible for thousands of biochemical reactions.
7. The portion of the digestive tract extending from the stomach to the anus and, in humans and other mammals, consisting of two segments, the small and the large.
10. Any of the bones or cartilaginous segments forming the spinal column.
12. The slender section of the leg immediately above the foot.
